

Memorandum

To: All LCDS Employees & Families
Date: January 23, 2022
From: Nick Salaris
Subject: COVID-19 Agency Outbreak Update

Good afternoon,

As expected, the omicron variant is continuing to impact our supports at multiple locations. These continue to be difficult and trying times. Our goal remains to get you the most accurate information in a timely manner, while keeping in mind the health and well-being of all.

This afternoon, we were informed that Lambton Public Health has declared an additional outbreak due to COVID-19 at our Hill St/Corunna location. We continue to work with Lambton Public Health and MCCSS to ensure proper notifications and protocols are in place and have occurred.

This leaves the agency with two locations currently in outbreak situations (Aniline St in Oil Springs and Hill St in Corunna). Our sincere gratitude is extended these teams and all those that are assisting behind the scenes as we work through these outbreak situations together.

We continue to be an essential service and it is critical we continue to serve the people we support through these challenging times. We will continue to follow the guidance of Lambton Public Health and do our best to prevent the spread of COVID-19.

We are extremely thankful to our dedicated employees for their continued resiliency and their dedication to the people we support. We will continue to keep you updated.

Be well. Be safe. Be smart.

Sincerely,

Nick Salaris
Executive Director
